-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 16 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 11-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Specifically, the application lacks support for the claimed recitations of “a lancer removably mounted in said housing” in claim 1 and “a second compartment adapted to removably receive and store a lancer” in claim 24. [Emphasis added] While claim language is viewed broadly and the specification is looked to in order to further understand the claims, the instant disclosure does not teach any part of the lancer that could be construed as “mounted in the housing” or “a second compartment on the housing to removably receive and store a lancer”.

In the Remarks section of the correspondence received on 3/14/2002, Applicant tries to assert that locking means 31 are a pair of hooks that are received in the housing. Locking means (31) are taught in the specification but are never further described to include hooks or any other structure. Additionally, the figures provide no further information regarding the locking means (31). The figures show element 31 as a quadrilateral shape, however one cannot tell if this structure extends from the lancer or is a recessed space (opening) that another member would

insert into. Furthermore, the quadrilateral shape could depict a "black box" element that depicts an entirely different intended structure.

Also, no reference to a compartment, or any similar language, that receives the lancer can be found in the specification. Additionally, the figures do not depict a compartment structure for receiving and storing the lancer. Conversely, the pictures more correctly show a concave portion on the lancer (surface with locking means 31: fig 3) that receives the housing (30).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over Castellano et al (USPN 5,728,074). Castellano discloses a housing (400), a monitor (442) integrally disposed in the housing, a medication delivery pen (22: see fig 25c), and a lancer (424) removeably secured to the housing. See figure 25a and 19:18-20:39. Castellano fails to include the delivery pen being removably mounted in the housing.

However, at the time of the invention, it would have been obvious to make the pen removeable from the housing. Making the pen removable is supported by the court and by common knowledge in the art.

The court has held that if making a component of a device removeable were desired then it would be obvious to make it so for that reason. In re Dulberg, 289 F.2d 522, 523, 129 USPQ 348, 349 (CCPA 1961) (The claimed structure, a lipstick holder with a removable cap, was fully met by the prior art except that in the prior art the cap is "press fitted" and therefore not manually removable. The court held that "if it were considered desirable for any reason to obtain access to the end of [the prior art's] holder to which the cap is applied, it would be obvious to make the cap removable for that purpose."). See M.P.E.P. 2144.04. In the instant case, one would desire removing the pen of Castellano upon failure of the pen to function while the rest of the system was still usable with the desire to replace the pen.

#### ***Allowable Subject Matter***

Claims 11-30 allowed.
